SPECIAL NOVELTY - An unexcelled mixture containing over 500 of the truly distinctive varieties we grow. By the law of averages you should get from 40 to 50 and could get as high as 100 varieties per 100 bulbs. Planted in a cutting bed they will give ample and diversified blooms for the home over a long period each spring. Each year we discard around 100 varieties to make room for newcomers. These discards are added to this **NOVELTY MIXTURE** which is in a class by itself for those not interested in named varieties, and yet who desire fine and unusual flowers over an extended period each spring.
